Profile Summary

Computer Science & AI student with strong foundations in C++, Python, OOP, and Data Structures. Experienced in practical university projects and daily coding practice. Fast learner with strong problem-solving skills, consistency, and adaptability.

Technical Skills

Programming: C++ (proficient), Python (basic), JavaScript (beginner)

Core CS: OOP, Data Structures (arrays, pointers, recursion, maps), Algorithms (DFS, BFS, backtracking)

Tools: Visual Studio, Git, GitHub

Projects

Audio Player (C++): Designed a basic audio player system with two players, mixer behavior, and playback controls.

Game Development Mini-Project: Built an interactive small game using basic game-loop logic.

Game Hub Console Application (In Progress): Developing a modular multi-game hub.

Daily Coding Practice: Routine practice for clean code and debugging.

Baby Photoshop Project: Created a small design using layers, cropping, and color adjustments.

Soft Skills

Problem Solving • Fast Learning • Adaptability • Teamwork • Consistency • Attention to Detail

Languages

Arabic: Native

English: Fluent
