

Naglaa Mohamed

Front-End Developer

Email: naglaamohamed1486@gmail.com | Phone: +20 102 666 4314

GitHub: <https://github.com/naglaamohamed1486-droid>

Profile

Front-End Developer with strong foundations in HTML, CSS, JavaScript, and React. Focused on building responsive and user-friendly interfaces while also developing solid problem-solving skills through C++ projects and object-oriented programming.

Technical Skills

- 1 HTML5, CSS3, JavaScript
- 2 React, Bootstrap
- 3 C++ (OOP, problem solving)
- 4 Git & GitHub
- 5 Responsive Design
- 6 Debugging

Projects

Khemet: Tourism discovery platform for Egypt focusing on hidden gems using local insights. Built with modern front-end tools and responsive UI design.

Uni-Connect: Platform that helps university students find teammates for projects and collaborations. Focused on usability and structured data presentation.

VelTune: C++ sound mixer application implementing core programming concepts and user interaction for audio control.

Ludoria: Advanced Tic-Tac-Toe variation in C++ demonstrating game logic, conditions handling, and structured programming.

Baby Photoshop: Basic image editing application in C++ implementing drawing and simple manipulation features.

Job Finding Website: Responsive front-end job listing platform with structured layout and navigation.

Countdown Timer: Dynamic JavaScript-based countdown application with real-time updates and reset functionality.

Mock Navigation Bar: Reusable responsive navigation component with hover effects and layout adaptability.

Education

Computer Science Student – currently studying programming, data structures, and software engineering concepts.

Soft Skills

- 1 Problem Solving
- 2 Continuous Learning

- 3 Attention to Detail
- 4 Communication
- 5 Time Management
