Profile

Motivated Computer Science student with strong problem-solving skills and solid experience in C++ and object-oriented programming. Interested in software development, cyber security, and competitive programming. Passionate about building efficient, scalable, and well-structured applications, with continuous learning in algorithms and system design.

Education

Bachelor of Computer Science / Artificial Intelligence

Faculty of Computers & Artificial Intelligence (FCAI)

Expected Graduation: 2028

Technical Skills

Programming: C++, C#, Python, JavaScript (Basic)

Web: HTML, CSS

Concepts: OOP, Data Structures, Algorithms, Recursion, Databases, SQL Basics

Tools: Git, GitHub, Visual Studio, VS Code, JUCE, Unity (Basic)

Other: Problem Solving, Debugging, Clean Code

Projects

Audio Player – C++ (JUCE)

- Developed a desktop audio player with GUI, playback, and file handling.
- Applied OOP and real-time audio processing concepts.

Image Filtering Program – C++

- Built an application for applying image filters using pixel manipulation.
- Focused on performance and algorithm optimization.

Word XO Game – C++

- Designed a console-based word game with custom logic.

- Used STL and OOP principles.

Algorithm Visualizer – C++ (Concept Project)

- Designed a tool to visualize sorting and searching algorithms.
- Helps understand time complexity and algorithm behavior.

Competitive Programming

- Preparing for ICPC contests.
- Strong practice in algorithms, recursion, and optimization problems.

Career Interests

Software Development | Cyber Security | Competitive Programming

Soft Skills

Problem Solving, Fast Learning, Teamwork, Attention to Detail

Languages

Arabic: Native

English: Excellent
